

Eshwara Pandiyan

519-990-2112 | pandiyae@uwindsor.ca | Windsor, Ontario

[Eshwara P](#)

TECHNICAL SKILLS

Languages & Frameworks:

- Python (NumPy, Pandas, TensorFlow, Keras)
- Java (OOP, multithreading)
- JavaScript (React, Node.js)
- C++ (STL, algorithm optimization)

AI & Machine Learning:

- Deep Learning (CNNs, RNNs, LSTMs)
- Reinforcement Learning (Q-learning, policy gradients)
- Graph Neural Networks (GCN), NLP (TF-IDF, word embeddings, transformers)

EDUCATION

Master of Applied Computing

Sep 2024 - Present

University of Windsor, Windsor, Ontario

- Available for Co-Op Internship from September 2025
- Relevant course work: Software Engineering, Systems Programming, Computing Concepts

Bachelor of Computer Science and Engineering (AI/ML)

Jul 2019 - May 2023

Hindustan Institute of Technology and Science, Chennai, India

- GPA 8.26/10
- Relevant course work: OOPS, Python, Data Structures, OS, Computer Networks

PROJECTS

Adaptive Workforce Intelligence System Using Knowledge Graphs

Jan 2025 – Apr 2025

University of Windsor, Windsor, Ontario

[Neo4j](#) | [FastAPI](#) | [Python](#) | [Multi-Agent Systems](#) | [Knowledge Graphs](#)

- Developed a Neo4j-powered pipeline to capture job-role-skill relationships with high contextual accuracy
- Built multi-agent architecture for skill gap analysis, job matching, and career path prediction
- Integrated live job feeds via Jooble API; achieved over 90% skill forecasting accuracy compared to static models

HomeConnect App

Sep 2024 - Dec 2024

University of Windsor, Windsor, Ontario

[React](#) | [Node.js](#) | [MongoDB](#)

- Developed a unified platform facilitates clear, efficient communication between landlords, tenants, and roommates
- Collaborated in a Scrum-based Agile team, participating in sprints, daily stand-ups and weekly reviews
- Implemented a maintenance request feature allowing tenants to log issues, track repair status, and receive updates

Fake Review Detection in Movie Recommendation System

Jan 2023 - May 2023

Hindustan Institute of Technology and Science, Chennai, India

[Sckit Learn](#) | [PCA-DAEGCN](#) | [TensorFlow](#)

- Developed an ML-based model to classify fake reviews using Graph Convolution Network and feature engineering
- Implemented NLP techniques such as TF-IDF and word embedding for improved accuracy

- Integrated hybrid ML algorithms for better precision in recommendation filtering

Fraud Detection using Ensemble Machine Learning

Aug 2022 - Dec 2022

Hindustan Institute of Technology and Science, Chennai, India

SVC | GaussianNB | Ensemble

- Designed an ensemble model combining random forests, Naive Bayes and KNN for fraud detection
- Applied feature selection techniques to improve efficiency and reduce computation time
- Evaluated model using real-world transaction datasets, achieving high detection rates

Netflix Stock Price Prediction using RNN

Jan 2022 - May 2022

Hindustan Institute of Technology and Science, Chennai, India

yFinance | Deep Learning

- Implemented LSTM-based RNN to forecast Netflix stock prices with time-series data
- Utilized historical market trends, volume, and technical indicators to train model
- Enhanced prediction accuracy by optimizing hyperparameters and reducing overfitting

Smart Car Parking System using IOT

Aug 2021 - Dec 2021

Hindustan Institute of Technology and Science, Chennai, India

- Constructed an IoT-based system using Arduino and sensors to automate parking space detection
- Implemented a mobile app interface for real-time availability updates

CERTIFICATES

Advanced Data Analytics, Google

- Learned Python programming, statistical analysis, regression, and machine learning
- Engaged on hands-on projects using tools like Tableau and predictive modelling

Introduction to Packet Tracer, Cisco

- Created simple simulated networks and investigated network functionality using simulation mode
- Configure Internet of Things (IoT) devices within the simulation

Data Science Internship, Sparks Foundation

- Real-world data science applications, feature engineering, and model deployment

AI & ML Workshop, Google

- Understand machine learning architecture, reinforcement learning, and TensorFlow

CAMPUS INVOLMENTS

Technical Head, Google Students Developers Club

Feb 2020 - Apr 2024

- Organized tech talks, coding bootcamps, and hackathons for students
- Mentored juniors in AI/ML and software development best practices

Event Organizer, Yarona

Mar 2022

- Coordinated a college-wide technical fest with 1000+ participants
- Managed sponsorship, logistics, and event scheduling

Bronze place, IBM ICE Day

Oct 2021

- Awarded for an innovative project on AI-driven cybersecurity solutions
